

ENVIRONMENTAL POLICY 2022-2023

This policy applies to all activities undertaken by NRG UK Group Ltd and impacts upon Staff, key suppliers and customers.

We are committed to minimising the environmental impact of our operations and activities. We strive to achieve this through our commitment to:

- Comply with all the relevant regulations and legislations.
- Regularly review the environmental impact of our activities with an aim to reduce our overall environmental impact and prevent/ reduce waste through best practice techniques (see Outline Construction Environmental Plan).
- Provide our employees with relevant training to help reduce waste and with regards to other environmental matters.
- Effectiveness reviews being carried out on an ongoing basis by our Project Managers on our sites to ensure we are effective in reducing/ preventing environmental impact.
- Our Project managers monitor and record any complaints, incidents or emergency on our sites.
- We regularly review and, where necessary, update our Environmental procedures at Senior level to ensure we are Environmentally responsible as a business in line with our Company values.
- Working closely with suppliers and encouraging them to develop environmental best practice including the use of sustainable materials (BES6001, FSC/PEFC).
- We regularly visit our supply chain premises to ensure that their environmental performance is as stated.
- Improving resource efficiency within the business premises.

Signed:

Daniel Crickmar
